A landmark study by biologists at Florida State University have uncovered a specific genetic and molecular mechanism that regulates cell polarity — the asymmetric-shape or composition critical to a cell's proper functioning. The researchers' findings in the development of cell polarity in the fruit-fly egg and the signals that trigger the development of cell polarity in the fruit-fly egg have broad implications for research into muscular dystrophy and some cancers develop in humans.

That's because many of the genes involved in the cell-to-cell communication that trigger the development of cell polarity in Drosophila oocytes (unfertilized fruit-fly eggs) are known players in the pathogenesis of those diseases. The research performed by FSU Assistant Professor Wu-Min Deng and doctoral student John S. Poulton in the department of biological sciences at Florida State University is a landmark study that describes a mechanism that regulates cell polarity — the asymmetric-shape or composition critical to a cell's proper functioning. “We didn’t really have to think twice to sign up for Westcott Lakes. I was retired and looking for a community near Tallahassee. It was a big change to go from five years where I had been out of the military, but I still wanted to attend FSU and stayed close to it all my retirement. Our daughter graduated in 1991 and his son graduated in 1999. He added that he wanted to attend FSU at least on a once or twice a year basis.

Lt. Gen. Franklin G. Hagenbeck’s military career started when he graduated from West Point and was commissioned a second lieutenant in the Army. After training at West Point, he became a captain. He retired as a major in the Army.

“I enjoyed my time in the Army. It’s a profession that I’ve found enjoyable and I’ve had a great deal of respect for the people that serve in the military,” he said.

Hagenbeck said he was also concerned about the support of the university. “I was interested in returning to Tallahassee to be closer to FSU,” he said.

liah at about nine and a half feet tall. Neither Yee Ming nor Maoist Red Guard stands within two feet of that mark.

In a perfect world, a hotel stay would be lots of things. It would be centrally located. Spacious. Furnished nice enough to move into. Because we aren’t living in a perfect world, we decided to create one that is.

We use intercollegiate athletics to under-

scribe those efforts. The enormous popular-

ity of college sports, coupled with the scale of

money expended and received, attracts crit-

ical attention from a range of political and so-

cial leaders. None of these people wish to

see but also voice sincere concerns about the

business of college athletics. Fair enough.

Other critics, however, are not so nice or he-

art.

Imagine how the course of history might

have changed if David asked to borrow a

heavy shield and sword from one of the Is-

raelite soldiers. Instead, David reasoned cor-

rectly that for all his noise and bluster and

size, Goliath was a more or less stationary tar-

get. David simply stood off a distance and

allowed the giant kill himself.

David vs. Goliath illustrates that there’s

nothing inherently unequal in any conflict.

David knew, and what every suc-

cessful David knows, is that you must never

allow the upper dog to make the rules. David

volunteered for the fight because he thought

he could win and she wanted the honor of de-

feating Goliah.

He has become tradition among a certain
to pour their unhappiness into that narrow

self-impressed elite who really hate football

will allow the upper dog to make the rules. David

same way Goliah wondered why David

wouldn’t face him toe-to-toe and fight like a

man. Like David, FSU has created a different

path to success.

We use intercollegiate athletics to under-

circle the controversy in college football.

The same is true of the universities of Miami,

and we use that recognition to advance our

image of our university on the national stage,

through the personal generosity of alumni

who cherish their relationship with the

school. It flows from the strength of our re-

sponse. We have a certain number of alumni
donors of academic gifts as well. We

know that a great deal of money walks into

our university through the locker-room door

and the doors of the universities of Miami,

North Carolina, Notre Dame and every other major institution with national

prestige, winning programs.

Athletics provides the most pervasive
image of our university on the national-stage, and we see that recognition to advance our
good works as an institution. We would not

be the great university we are today if not for

the broad financial and promotional impact

of collegiate athletics.

A college degree is an effective investment and, like all investments, it must be nurtured. There are a variety of ways Florida State University alumni can choose to protect their investment, including joining the Seminole Boosters, serving as mentors or guest speakers in the classroom, joining the FSU Alumni Association, participating in local Seminole Club activities, or supporting FSU’s superior fine arts programs by attending concerts, plays and activities, or supporting FSU’s superlative fine arts programs by attending concerts, plays and activities, or supporting FSU’s superlative fine arts programs by attending concerts, plays and activities, or supporting FSU’s Our promise to you
is to continue to uphold the
integrity of this great institution
by raising, investing and managing
your dollars with the same sense
of sincerity by which you have
expressed your commitment to
Florida State University.

This is our mission
This is our commitment
This is MY promise
